

można wydrukować dokumentu w tej ramce tak jak jest wyświetlony.

ramka zostanie wydrukowana oddzielnie.

Example

Checking if a customer sequence supports a candidate sequence?

$\text{maxGap} = 30$ ,  $\text{minGap} = 5$ ,  $\text{WS} = 0$ .

Candidate sequence  $\langle (1, 2), (3), (4) \rangle$

$$\begin{array}{c} \text{---} 10 \quad 10 \text{---} \\ | \quad | \\ 45 \quad 45 \\ | \quad | \\ 45 - 10 = 35 < 30 \end{array}$$

$$t_s = 45 - 30 = 15$$

$$\text{---} 50 \quad 80 \text{---}$$

$$t_s > 50 + 5 = 60$$

$$\begin{array}{c} \text{---} 65 \quad 65 \text{---} \\ | \quad | \\ 65 - 50 = 15 < 30 \end{array}$$

$$t_s > 65 + 5 = 70$$

$$\begin{array}{c} \text{---} 90 \quad 90 \text{---} \\ | \quad | \\ 90 - 65 = 25 < 30 \end{array}$$

Example

~~WS = 7~~

$$t_s > 20$$

WS = 7

and sequence

element (2, 6) to be found

$$t(1) = \langle 10, 50 \rangle$$

$$* t(2) = \langle 10, 50, 80 \rangle$$

...

$$* t(6) = \langle 25, 95 \rangle$$

$$\begin{array}{c} \text{---} 25 \quad 50 \text{---} \\ | \quad | \\ 50 \quad 95 \\ | \quad | \\ 90 \quad 95 \end{array}$$
